System and method for segmenting a database based upon data attributes James F. Knutson et al

◄ Page | 1 | Go ►

Patent summary

Patent number: 5870746
Filing date: Oct 31, 1996
Issue date: Feb 9, 1999

Abstract
A system and method for allowing a user to segment and partition a database based upon attributes associated with the data in the database. Also, a system and method for generating a report for a user which allows the user to make decisions, without requiring the user to understand or interpret...
